

YOU MIGHT BE AN ENGINEER OR TECHNICIAN IF...

The only jokes you receive are through e-mail

At Christmas, it goes without saying that you will be the one to find the burnt-out bulb in the string

Buying flowers for your girlfriend or spending the money to upgrade your RAM is a moral dilemma

Everyone else on the Alaskan cruise is on deck peering at the scenery, and you are still on a personal tour of the engine room

In college you thought Spring Break was a metal fatigue failure

The salespeople at Circuit City can't answer any of your questions

You are always late to meetings

You are at an air show and know how fast the skydivers are falling

You bought your wife a new CD-ROM for her birthday

You're more interested in the ultrasound equipment than seeing your baby on the screen

You can quote scenes from any Monty Python movie

You can type 70 words a minute but can't read your own handwriting

You can't write unless the paper has both horizontal and vertical lines

You comment to your wife that her straight hair is nice and parallel

You forgot to get a haircut ... for 6 months

You go on the rides at Disneyland and sit backward in the chairs to see how they do the special effects

You have Dilbert comics displayed anywhere in your work area

You have ever saved the power cord from a broken appliance

You have more friends on the Internet than in real life

You have never bought any new underwear or socks for yourself since you got married

You know what <http://> actually stands for

You look forward to Christmas only to put together the kids' toys

You see a good design and still have to change it

You spent more on your calculator than on your wedding ring

You still own a slide rule and you know how to work it

You think that when people around you yawn, it's because they didn't get enough sleep

You wear black socks with white tennis shoes (or vice versa)

You window shop at Radio Shack

You're in the back seat of your car, she's looking wistfully at the moon, and you're trying to locate a geosynchronous satellite

You know what the geosynchronous satellite function is

Your laptop computer costs more than your car

Your wife hasn't the foggiest idea what you do at work

Your wristwatch has more computing power than a 300Mhz Pentium

You've already calculated how much you make per second

You've ever tried to repair a \$5 radio
